

# Climate Zones

## **B.Q. Where are the different climate zones?**

Climate is the average weather condition of a place over a long period of time. The climate of a location is often linked to its location in the world. Places near the equator will have a hotter climate than places near the North and South Poles which will have a colder climate. These are climate zones.

# Types of Climate Zones

Climate Zone	Description	Example
Polar	Very cold and dry all year round	Antarctica
Temperate	Cold winters and mild summers	UK
Arid	Dry and hot all year round	Sahara Desert
Tropical	Hot and wet all year round	Brazil
Mediterranean	Dry, hot summers and mild winters	Spain
Mountainous	Very cold, sometimes wet, all year	Himalayas

These places are in different climate zones, can you use an atlas to name the country or area? Which zone is each one in?

UK  
Temperate

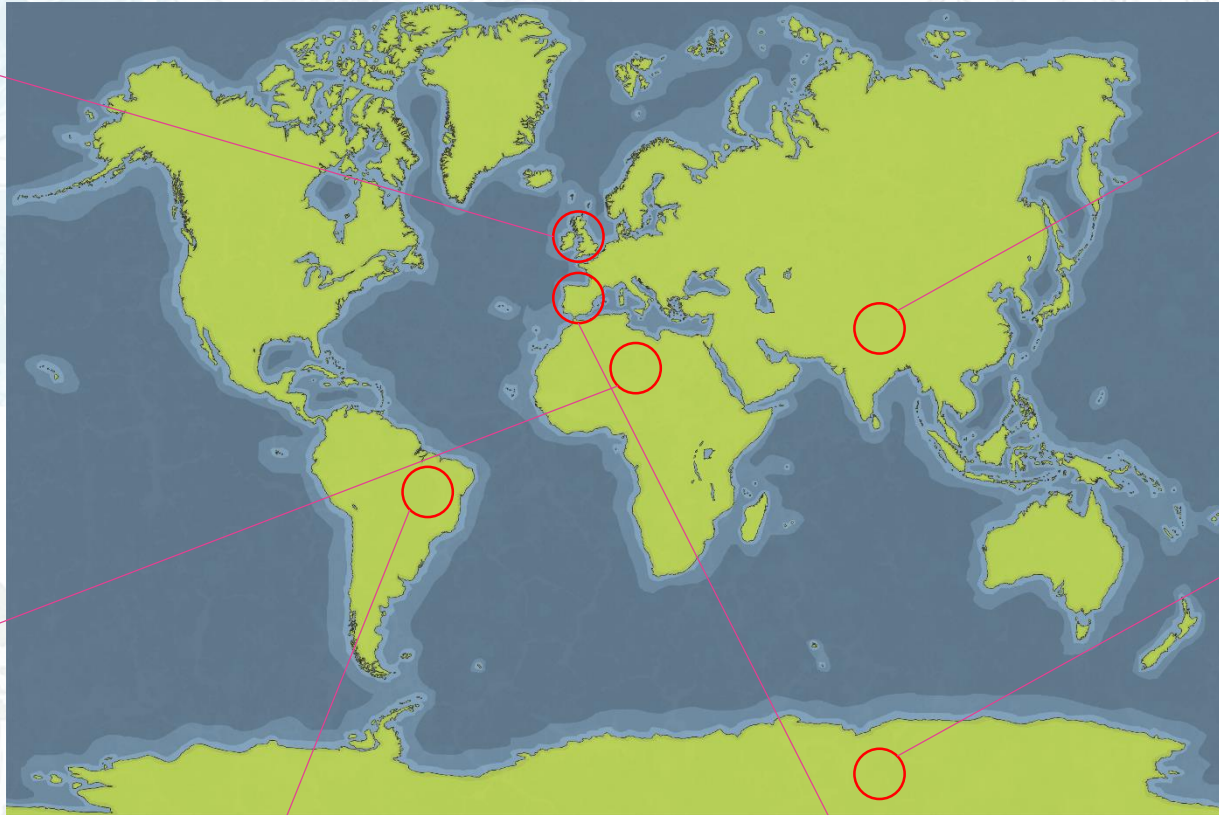

Himalayas  
Mountainous

North  
Africa  
Arid

Antarctica  
Polar

Brazil  
Tropical

Spain  
Mediterranean

# Different Climate Zones

Your task is to draw and colour the different world climate zones on the world map I have included. You can create your own key if you wish.
