

Hi Year 5,

Well done for another great couple of days back in school. I hope those of you at home are still keeping busy and feeling happy. What have you been doing this week? At school we all miss you and look forward to being a whole class again in September.

As we come to the end of Year 5, we have been starting to think more about the transition into Year 6. I'm sure you are looking forward to your final year at primary school and I know there is lots for you to be excited about. If you haven't joined us back at school yet, keep checking out our Twitter to see what's going on in school.

Let's hope the sunshine comes back soon. Enjoy your week!

Writing

Now you know the features of a persuasive text, I would like you to prepare your letter of application. I have attached a list of the year 6 class jobs and roles you may wish to apply for. At this time I'd like you to focus on one or two of the roles that you think you'd be a good candidate for.

See the writing frame for guidance on how to write your letter of application. Remember, you have amazing skills and qualities so don't be shy, list all your qualities and think about giving some examples of when you've demonstrated them at school.

I look forward to reading your letters. We will be continuing this in school on Wednesday and Thursday.

Reading

You can find my video of How to Train Your Dragon, chapter 5 on our YouTube channel.

Your task this week is to write your own set of instructions, with explanation, on How to Train Your Dragon.

It would be good to include illustrations, diagrams, labels and captions to make your instructions aesthetically appealing and reader friendly.

Spelling

This week's spelling list looks at a list of challenge words. Remember to find out and apply the meaning of these words. Use them in conversations and writing to help you learn them successfully.

Maths

This week we will be learning about the properties of 3D shapes and identifying shapes by their nets.

Start by watching this clip, which will remind you about the properties.

<https://www.bbc.co.uk/bitesize/topics/zjv39j6/articles/zgqpk2p>

Use the lesson PowerPoint link to work through over the week. There are a range of tasks to learn about the properties and nets. You can even create your own shape net!

Remember to use TT Rock Stars to practice your times table.

Something different

This week I would like to create a quiz, comic strip or your own innovative way to present a reflection of your time in year 5.

This could showcase the highlights of the year. To remind you of some of the things we've done, I have included some photos and a list – see Power Point.

Extra Challenge:

This week we would like you to have a think about what career you would like to have in the future. There are many different jobs in the world, think about your favourite subject and how it could lead to a job. For example, if you enjoy maths and science maybe you might want to become an engineer. If you are stuck ask your parents or carers what they do and it might inspire you! Have a go and create a collage of ideas!

Best Wishes,
Miss O'Kelly
